報紙機 Newspaper Vending Machine

黃孝承 Hsiao-Cheng Huang

報紙機，一個會製造報紙並且販售的機器，報紙中的新聞資料來自於網路上的新聞網站，擷取後再加以杜撰，進而創造出另一種真相；將新聞照片更換成在買報紙的顧客或是隨機取樣的影像，合成後產生一條條新的新聞，而整份報紙既虛假又真實。

Newspaper Vending Machine is a machine that not only sells but also produces the newspaper. The news that appears in the newspaper is taken from the latest news as presented on online news sites; this news is then altered to introduce fabrications, creating a different reality. The photos accompanying the news stories are replaced by photos of the people that have been buying the newspaper, or by random images. By synthesizing these different elements, “new” news is created, and the newspaper as a whole becomes a combination of the fake and the real.
