

## [瓶·聲響] sound.of.bottles

王仲堃 Chung-Kun Wang

作品[瓶·聲響]亦為「百聲計畫」系列的延伸作品。在此之前的同系列作品[聲瓶]，是使用自製的奇幻樂器作為現場演出的裝置，而在[瓶·聲響]裡則是採集這自製樂器的聲音，重新組合拼貼，創造出有別於現場演出的即興。

This work *Sound.of.Bottles* is also an extension of the “Big Bang Project”. Another work in the same series called *Sound of Bottles -installation* uses home-made musical instruments as the installation for impromptu performance. And *Sound.of.Bottles* is a collection of the sounds from the home-made musical instrument by re-arranging them; hence it should be distinguished from the spontaneous nature of live performance.
